## PERSONAL PROJECTS

### Study Web Application (12/2020 - Present)

- A react-js web app which provides study material and tutorial to their users.(subject to NDA, no further details available).

### Pink pets (02/2020 - 11/2020)

- A react native application which provide some vet/vas services for pets to their user.My role in this is to manage UI and implement API to connect with backend.

### Truck Brokers (03/2020 - 07/2020)

- This is a react js project which provides users to find truck by near-by location with their charges so user can book and pay through this.My role in this is to manage UI and implement APIs.

### Ziiki Media (12/2019 - 03/2020)

- Ziiki media provide its user a admin panel according to their roles.Where user can manage that section accordingly.My role in this project is to manage UI and manage APIs to connect angular and laravel with each other

### Panvel (08/2018 - 10/2018)

- This is also a government app. In this application user can register complaint. Every complaint contains unique complaint number and status. Whenever admin reply on a particular comment or change the status then user get a push notification on the device.

### Mung Advisor (06/2018 - 09/2018)

- This is a government project which contains the basic details and valuation of the pulses (Mung) in react native. It contains the basic statics and region-based details for the pulses state wise. My role in this is to create Ui and api's to connect laravel and react native with each other.

### Icar -Cifa (03/2018 - 05/2019)

- This is a mobile application built in React Native. This is an Orissa govt. project. In this application user can gain a lot of information regarding fishery. In this application user also can ask their queries.
