Summary

Multi-tasking with 1.6+ years of experience in javascript, JQuery, ReactJS. Built many projects in ReactJS including Math modules, graph modules. Also have experience in working with Unity3D and maya.

Experience

October 2018 - Working | Izaac Technology

- **Language:** HTML5, CSS3, JS/JQ, React JS, Bootstrap4
- **Framework:** UNITY3D, Autodesk MAYA.
- **Database:** MySQL, MongoDB

Working Experience

1. ReactJS Projects

- **Order Arrange** This is completely created with ReactJS and CSS. In Order Arrange module, students are required to choose and arrange the given options in the correct sequence using drag & drop method.
- **Spot on Image** This module is based on ReactJS & CSS. In this module, a part of an image can be chosen as the right answer also called the Spot and user will have to click on that spot for the answer to be correct.
- **Text Highlight** In this module, particular words in a paragraph can be selected for the right answer and user will have to choose those particular words out of the paragraph for right answer.
- **Multi Grid** This module is based on a puzzle game. Both pictures and texts can be used to construct a puzzle and user will have to join the pieces in a sequential format for the right answer.
- **Choice Matrix** In this module, there are multiple choice questions in a matrix format.

2. Unity3D learning based games [Unity3D, MAYA]

- **Telephonic scene based game** This is scenario-based 3D simulation. In this various questions have been involved in between the conversation. It is created with UNITY3D.

3. Snake game build using JS

- During my training period, I made a snake game using JS and Canvas.
