- Participate In project meeting and discussions with managers and project leads as required.
- Cooperating & communicating with other team members for efficient management works.
- Involved in Understanding functional specifications and developing creative solutions to meet business requirements.

Project Overview

Project: Personal Traveler
Role: Design & development
Technologies: ReactJS, Material-UI
Team Size: 3

- Personal Traveler is a Website for Wipro Employees to book hotel and flight when traveling for official purpose. It contains many screens from login till booking screen.
- In this website I have mostly worked on **designing UI views with Grids & Container and developed "filter" functionality for filtering the flight and hotel result** as per the convenience and worked on API functionality and developed the code to call the API to fetch the data and populate on the UI
- Also Designed t**he table part which shows the search** result according to the user details.
